| Creation Date | February 14th 2023 |
| Created By | Yashaswi LN Pasumarth Mitansh Kayathwal Vrinda Agarwal Swayam Agrawal |
| Client | Bhaskar - ZAM Logistics |

Brief Problem Statement:

Hire Truck: This Project aims to create an interface for goods transportation services enhancing the lives of both the customers and the transportation services as well. The main goal is to ensure the maximal utilization of transportation vehicles, especially during their return journey.

Team Members:

Yashaswi LN Pasumarth
Mitansh Kayathwal
Swayam Agrawal
Vrinda Agarwal

Team Communication

The team has decided to meet on regular basis at public working places for discussions and work towards the project. Apart from that, a separate group has been created on social media platforms for in-group discussion. The team has a separate google doc platform

where we interact with ourselves and the client. Also, the team is connected to development platforms like GitHub and GitLab so, progress and doubts are resolved right away.

Development Environment:

While building this product, a number of software/tools have been used owing to their complexity and requirements. They are stated as follows:

- Microsoft Word
- ReactJS
- MongoDB
- ExpressJS
- NodeJS
- GitLab/GitHub
- Gmeet
- Google Docs

Milestone Schedule:

This discusses about the high-level milestones that are aimed to achieve during the process of product development. There are two kinds, deliverable and non-deliverable.

| Milestone | Due Date | Release | Deliverable? |
|-----------------------|----------|---------|--------------|
| Background Research | Feb 12 | R1 | No |
| Requirements Document | Feb 12 | R1 | Yes |
| UI/UX | Feb 20 | R1 | Yes |
